

The 2015 NPT Peace Walk for a Nuclear Free Future

For Peace and the Planet | From San Francisco to the United Nations in New York City

Friday March 20th to Sunday Apr 26th

2015 marks 70 years since the US atomic bombings of Hiroshima and Nagasaki.

We have since learned their full impact, not just on the residents of those cities but on places and people where the uranium was mined, the bombs tested, the waste stored. We must end this chain of nuclear destruction. Carrying this urgent prayer, we walk to the Nuclear Non-proliferation Treaty Review Conference at the United Nations in New York City. **On the way, we visit Native American communities where people continue to suffer from all the stages of the nuclear chain. Many Pacific Islanders also still suffer from the effects of the testing on their islands.** We walk for a sustainable society where we can live in harmony with Mother Earth. Peace-walkers from Japan will report on the on-going nuclear power plant disaster at Fukushima.

- ❖ **Nuclear Non-Proliferation Treaty (NPT):** The treaty's objective is to prevent the spread of nuclear weapons and facilitate negotiations on their global elimination. Since 1970, a review conference has been held every five years. Although NPT Article VI mandates that all states commence negotiations for total elimination of nuclear weapons, little progress has been made due to lack of commitment from the nuclear-armed states. Further, Article IV promotes "peaceful use of nuclear technology." An investigation into the health of the communities near any site where uranium has been mined or waste is stored reveals that even if used solely as a source of power generation, the impacts of the nuclear chain are utterly destructive and unmanageable. We need to urge the nuclear powers to acknowledge this and call for an end to ALL nuclear technology for the survival of Mother Earth and all beings.
- ❖ **Lawrence Livermore Nuclear Laboratory:** Located east of San Francisco, the laboratory is one of two main research sites focused on updating nuclear weapons. They have developed such technologies as plutonium and the H-bomb.
- ❖ **Diablo Canyon Nuclear Power Plant:** Located in Central California. The last operating nuclear power plant on the West Coast of North America, this plant stands on the sacred sites of the Chumash Tribe near thirteen earthquake faults.
- ❖ **Nevada Test Site:** The largest nuclear test site on the globe. From 1951 to 1992, a total of 928 nuclear tests (both atmospheric and underground) took place at the Nevada Test Site on the lands of the Western Shoshone tribe. Radioactive fallout creates downwind sickness even today. The nearby Yucca Mountain Nuclear Waste Repository is currently closed but efforts are underway to reopen it.
- ❖ **Big Mountain:** Located in Central Arizona, Big Mountain is an area rich in natural "resources" including uranium, coal and natural gas. The surrounding area was peacefully cohabited by the Navajo (Dineh) and Hopi peoples for generations. Since the encroachment of European settlers, the federal government has successfully pitted the two tribes against one another in the interest of land grabs, first for western expansion and then "resource" development. The Dineh have continually suffered from forced relocation; living in close proximity to massive extraction facilities; and being subjected to the jurisdiction of the Hopi Tribal Council, in which they are denied representation or participation. The late Nipponzon Myohoji monk Shimanuki Shonin made his life practice there.
- ❖ **West Valley:** In the suburbs of Buffalo, NY, massive amounts of radioactive nuclear waste are buried in West Valley and pose a great threat to the land and people of the Seneca Nation.
- ❖ **Knolls Atomic Power Laboratory:** Located outside of Albany, NY, the laboratory conducts research & development for the production of nuclear submarines.
- ❖ **Indian Point Power Plant:** This aging nuclear power plant is located less than 50 miles from Manhattan. The original 40- year operating license expired in 2013. The current license will expire in 2015.

No Drugs, No Alcohol, No Weapons.

We will typically walk 12-18 miles per day.

Join us for any amount of time.
